## Which Filter Do I Choose?

Contact Sherry Farley, V.P. Sales & Marketing

**Universal Shower Filter:** Do you like your shower head but want the benefit of showering in filtered water? Universal Shower Filters are the answer. The Universal Filters are designed to be used with a standard shower head. The filter fits between the shower head and pipe. A variety of designs and finishes are available, including solid brass.

**Filtered Shower Head:** All models come complete with a replaceable filter tucked inside the unit. The shower head unscrews into two halves to reveal the filter cartridge. Choose a wide range of spray patterns—from 3 to 8 spray settings. Finishes include white, chrome, gold and brushed nickel.

**Filtered Shower Handle:** The replaceable filter cartridge is hidden inside the handle.

Shower handles are very versatile as they can be taken out of the bracket and used while sitting, cleaning and shaving in the shower. Plus, they are great for kids and pets, too. Depending upon the model, spray patterns range from mist to massage with 3 to 8 different spray settings. A hose and bracket are included.

**Filtered Extensions:** The ShowerUp® series of Filtered Extensions brings new heights of luxury to the bathroom. The wide range of movement provides a multitude of shower positions. Choose from two all-brass models in chrome, brushed nickel or oil rubbed bronze finishes, with optional shower head.

**Bath Products:** Sprite hasn't forgotten about conditioning the bath water either! Dechlorinating Bath Salts neutralize the Chlorine in the bath water. With no added scent or fragrance, they can be used with other bath products.

The Bath Ball attaches to the tub spout to condition the water for a luxurious bath.

**The Baby Shower®:** The Baby Shower simply attaches to the kitchen faucet or existing shower arm—instantly the water is fresh, clean and healthy! The handle size and gentle spray are a perfect fit for infants and children alike.
