

## FILTERED EXTENSION

### OWNER'S INSTRUCTIONS

#### INSTALLATION

1. Remove existing showerhead from shower arm.
2. Loosen wing nuts by turning counter clock wise to rotate elbow
3. Attach to shower arm.
4. Attach showerhead .

**TO ACTIVATE FILTRATION MEDIA, RUN HOT WATER THRU THE FILTER FOR A FULL TWO MINUTES AFTER INSTALLING.**

#### OPERATION: (Before entering the shower)

1. Turn the shower water on to the "Full Hot" Position, to activate filtration media.
2. After hot water is flowing thru the filter, cool to the desired showering temperature.

#### FILTER CARTRIDGE REPLACEMENT (replacement cartridge model HHC)

The filter cartridge should be replaced every 3 months or sooner (depending on individual water conditions).

1. Remove cartridge by unscrewing Filter Housing counter clock wise.
2. Remove paper seals from each end of the new filter cartridge and lubricate o-rings with a small amount of Vaseline.
3. Insert cartridge into filter housing and reattach neck.
4. Flush for two minutes before using.

#### NOTICE OF LIMITATIONS

- The Filter Extension is designed for potable water systems only.
- This system is not intended to be used as a drinking water treatment unit.
- Both the system and the installation must comply with applicable state and local regulations.
